

IPCT Call for Proposals - NOW OPEN

Today, The Ministry of Health, in collaboration with Ontario Health, [launched the 2027-28 Call for Interprofessional Primary Care Team \(IPCT\) Proposals](#).

This call is part of [Ontario's Primary Care Action Plan](#) to connect every person in the province to convenient primary care by 2029 – investing over \$250 million to create or expand approximately 78 interprofessional primary care teams (IPCTs) that will connect 600,000 more people to care. This is the third round of a multi-year process of funding and Ontario Health has confirmed there will be additional opportunities to apply for funding - and anticipate the next round of proposal intake and assessment to launch in fall 2027.

Like the previous rounds, for 2027-28 funding, existing or prospective primary care teams will submit proposals through their associated OHT and PCN. All OHTs and their PCNs are eligible to submit proposals for new and expanded IPCTs through the General Stream.

Interested Indigenous-led proponents may choose to submit a proposal through an OHT and their PCN, but it is not required. Indigenous-led proponents can submit proposals independently.

The deadline for submissions is November 20, 2026, 5:00 PM Eastern Time.

New for this round, OHTs and PCNs will submit a Context and Endorsement Form to identify and endorse the proposals they support, while providing additional context regarding how the proposals align with their broader approach to primary care attachment. The information provided through this form is intended to give Ontario Health and the Ministry additional local and strategic context, as well as confirmation of endorsement. The form will not be scored as part of the proposal evaluation.

Also new for this round, during the Call for Proposal period, Ontario Health will schedule a midpoint proposal development check-in with each OHT and their PCN and may include the Ministry to ensure alignment with the strategic priorities of the Call for Proposals. Additional details on this check-in will be shared with OHTs and PCNs in advance of the meeting.

IPCT Updates

The current call for proposals for Interprofessional Primary Care Teams opened September 29, 2026 as part of the province's \$3.4 billion plan to connect every person in the province to primary care by 2029.

Current Status: OPEN

Proposals must be submitted by OHTs and PCNs by November 20, 2026.

Like the approach we used in the two previous rounds, all information and supportive resources related to the 2027-28 call for IPCT proposals will be posted on our [IPCT Updates website](#) as it becomes available.

The following information is now posted:

Call Instructions have been published by the province with detailed information related to the development and submission process for proposals, for both General and Indigenous-led streams

When you are determining whether your organization has the capacity to develop a proposal and implement an expansion project, please carefully consider the "Strategic Evaluation Priorities of the Call for Proposals" and "Proposal Development Considerations" (pages 5-7 in the Call Instructions).

Proposal Package including the proposal form, budget template and supportive appendices, was provided by Ontario Health to OHTs and PCNs to share.

This year's proposal package has been updated based on feedback from previous funding rounds and lessons learned through the proposal development and evaluation processes. Changes have been made to improve flow, reduce duplication, and strengthen alignment with the strategic evaluation priorities of the Call for Proposals. OHTs, their PCNs, and proponents are encouraged to review the attached materials prior to beginning proposal development.

Key Dates and Upcoming Webinars

Technical Webinar (General): Tuesday, October 6th at 12:00pm EST

Ontario Health will walk through the proposal package, reporting requirements, budget template expectations, midpoint check in expectations for the proponents and OHTs and their PCNs, and answer your questions.

Details for other upcoming webinars will be added as they are made available.

Our OHT team is also reviewing the materials received today from the province and will join the technical webinar with you next week to learn more about the changes for this round!

We encourage you to [use this link](#) to join Ontario Health's technical webinar to learn more about this process with us
